Education

Integrated MCA (4th Year)

IIPS, DAVV University, Indore

2023 – Present

Current CGPA: **7.5/10**

Class XII (CBSE) – Science with Mathematics

Saint Paul's School, Katni

2023

72%

Technical Skills

- **Languages:** Python, JavaScript, Dart, HTML5, CSS3
- **Machine Learning:** Data Preprocessing, Supervised & Unsupervised Learning, Scikit-Learn, Pandas, NumPy
- **Frameworks & Libraries:** Flutter, React.js, Tailwind CSS
- **Backend & Cloud Services:** Firebase (Authentication, Firestore, Cloud Messaging)
- **Developer Tools:** Git, GitHub, VS Code, Postman
- **Core Competencies:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Responsive UI/UX Design, REST APIs

Experience

Flutter Developer Intern

May 2026 – Jul 2026

Ekagad ventures private limited

- Engineered production-ready cross-platform mobile features for the **Meditate Career Institute** app using Flutter and Dart.
- Integrated Firebase backend services including user authentication, real-time database syncing, and push notifications.
- Optimised UI layout rendering across multiple screen pixel densities, improving app startup times and reducing overall UI latency.
- Collaborated in an agile workflow to perform code reviews, fix visual bugs, and enhance overall user interaction flow.

Frontend Developer Intern

Feb 2026 – Apr 2026

Sheroes Sewa Social Welfare Society

- Architected responsive web interfaces using React.js and Tailwind CSS for a live non-profit organisation platform.
- Developed modular, reusable frontend component libraries to ensure visual consistency and expedite feature rollouts.
- Improved platform accessibility compliance and enhanced cross-browser rendering compatibility.

Projects

Meditate Career Institute Mobile App

Flutter, Dart, Firebase

- Built a cross-platform educational application supporting course view modules, dynamic data fetching, and user profiles.
- Implemented secure client authentication using Firebase Auth alongside Firestore database structures for real-time tracking.

Explore Bharat (Smart India Hackathon)

HTML5, CSS3, JavaScript

- Designed an interactive web platform promoting regional tourism and cultural exploration across India.
- Developed adaptive layout mechanics and custom UI controls to streamline user navigation.
- Achieved **Grand Finale Waitlist recognition** among thousands of competing teams in the Smart India Hackathon.

Water Management System

React.js, Tailwind CSS

- Formulated a web application dashboard targeting regional water resource tracking and usage analytics.
- Integrated responsive, stateful UI components providing seamless data visualisation views for users.
